2.15x2.4mm, Super Bright Yellow LED

Subminiature Axial Flat Top View Chip LED Indicator

Technical Data Sheet

Features:

- Small double-end package.
- EIA Std. package.
- Mono-color type.
- High reliability.
- Low forward voltage.
- Compatible with automatic placement equipment.
- The product itself will remain within RoHS compliant version.

Descriptions:

- The A21 SMD taping is much smaller than leaded components. Thus enable smaller board size. Higher
 packing density. Reduced storage space and finally smaller equipment to be obtained.
- Besides, light weight makes them ideal for miniature applications.
- Furthermore by automation assembly machines the accuracy is anticipated.

Applications:

- Small indicator for indoor applications.
- Flat backlight for LCD, switches and symbols.
- Indicator and backlight in office equipment.
- Indicator and backlight for battery driven equipment.
- Indicator and backlight for audio and video equipment.

2.15x2.4mm, Super Bright Yellow LED

Technical Data Sheet

Absolute Maximum Ratings at Ta=25℃

Parameters	Symbol	Max	Unit	
Power Dissipation	Pd	60	mW	
Peak Forward Current ^(a)	IFP	100	mA	
DC Forward Current ^(b)	IF	25	mA	
Reverse Voltage	VR	5	V	
Electrostatic Discharge (HBM)	ESD	2000	V	
Operating Temperature Range	Topr	-40℃ to +80℃		
Storage Temperature Range	Tstg	-40℃ to +85℃		
Soldering Temperature	Tsld	260°C for 5 Seconds		

Notes:

- a. Derate linearly as shown in derating curve.
- b. Duty Factor = 10%, Frequency = 1 kHz

Electrical Optical Characteristics at Ta=25℃

Parameters	Symbol	Min.	Тур.	Max.	Unit	Test Condition
Luminous Intensity ^(a)	IV	80	120		mcd	IF=20mA
Viewing Angle ^(b)	201/2		140		Deg	IF=20mA
Peak Emission Wavelength	λр		592		nm	IF=20mA
Dominant Wavelength ^(C)	λd		590		nm	IF=20mA
Spectral Line Half-Width	Δλ		15		nm	IF=20mA
Forward Voltage	VF	1.60	2.00	2.40	V	IF=20mA
Reverse Current	IR			10	μΑ	VR=5V

Notes:

- a. ALuminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.
- b. 201/2 is the o -axis angle where the luminous intensity is 1/2 the peak intensity
- c. The dominant wavelength (λd) is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.

Technical Data Sheet

CAUTIONS

1. Handling Precautions:

- 1.1. Handle the component along the side surfaces by using forceps or appropriate tools.
- 1.2. Do not directly touch or handle the silicone lens surface. It may damage the internal circuitry.
- 1.3. Do not stack together assembled PCBs containing exposed LEDs. Impact may scratch the silicone lens or damage the internal circuitry.

Compare to epoxy encapsulant that is hard and brittle, silicone is softer and flexible. Although its characteristic significantly reduces thermal stress, it is more susceptible to damage by external mechanical force. As a result, special handling precautions need to be observed during assembly using silicone encapsulated LED products. Failure to comply might lead to damage and premature failure of the LED.

2. Storage

- 2.1. Do not open moisture proof bag before the products are ready to use.
- 2.2. Before opening the package, the LEDs should be kept at 30°C or less and 60%RH or less.
- 2.3. The LEDs should be used within a year.
- 2.4. After opening the package, the LEDs should be kept at 30°C or less and 60%RH or less.
- 2.5. The LEDs should be used within 168 hours after opening the package.
- 2.6. If the moisture adsorbent material has fabled away or the LEDs have exceeded the storage time, baking treatment should be performed using the following conditions. Baking treatment: 65±5°C for 24 hours.

3. Soldering Condition

3.1. Pb-free solder temperature profile

- 3.2. Reflow soldering should not be done more than two times.
- 3.3. When soldering, do not put stress on the LEDs during heating.
- 3.4. After soldering, do not warp the circuit board.
- 3.5. Recommended soldering conditions:

Reflow soldering		Soldering iron		
Pre-heat	150~200°C	Temperature	300°C Max.	
Pre-heat time	120 sec. Max.	Soldering time	3 sec. Max.	
Peak temperature	260°C Max.		(one time only)	
Soldering time	10 sec. Max.(Max. two times)			

3.6. Because different board designs use different number and types of devices, solder pastes, reflow ovens, and

Technical Data Sheet

circuit boards, no single temperature profile works for all possible combinations.

However, you can successfully mount your packages to the PCB by following the proper guidelines and PCB-specific characterization.

4. Drive Method

4.1. An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

- a. Recommended circuit.
- b. The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

Terms and conditions for the usage of this document

- 1. The information included in this document reflects representative usage scenarios and is intended for technical reference only.
- The part number, type, and specifications mentioned in this document are subject to future change and 2. improvement without notice. Before production usage customer should refer to the latest datasheet for the updated specifications.
- When using the products referenced in this document, please make sure the product is being operated within the 3. environmental and electrical limits specified in the datasheet. If customer usage exceeds the specified limits, Luckylight will not be responsible for any subsequent issues.
- The information in this document applies to typical usage in consumer electronics applications. If customer's 4. application has special reliability requirements or have life-threatening liabilities, such as automotive or medical usage, please consult with Luckylight representative for further assistance.
- The contents and information of this document may not be reproduced or re-transmitted without permission by 5. Luckylight.
