8mm,3W Warm White LED K1 Shape LED Light Source

# Luckylight

#### **Technical Data Sheet**

#### Features:

- long operating life
- Small footprint and low profile
- Energy efficient
- High current operation
- Silicone encapsulation
- Available in 2700K, 3000K, 3500K, 4000K, 5000K, 5700K, 6500K and 10000K
- The product itself will remain within RoHS compliant Version

### **Descriptions:**

- The HP70M series is available in Red, Orange, Yellow, Green, Blue and White. The White Power LED is available in the range of color temperature from 2700K to 10000K
- This 3W Power LED Light Source is a high energy efficient device which can handle high thermal and high driving current. The exposed pad design enables excellent heat transfer from the package to the motherboard
- The package design is suitable for a wide variety of applications especially where height is a constraint.

#### Applications:

- Architectural lighting
- Channel backlighting
- Contour lighting
- Retail Display lighting
- Decorative lighting
- Garden lighting

Spec No.: HP70M Date: 12-Sep-2017

8mm,3W Warm White LED K1 Shape LED Light Source

## Luckylight

#### **Technical Data Sheet**

#### **CAUTIONS**

#### 1.Storage:

To avoid moisture, we recommend storage conditions for the unopened LED +5  $\sim$  +30 °C, relative hu-midity <60%. LED should be used within 24 Hrs. of opening the package. Please make sure to dehumid-ify and vacuum pack the remaining/ unused LED. Dehumidifying condition: +60 °C  $\pm$  5 °C, 12 Hrs. Effective age for the sealed led is one year.

#### 2. The assembly notes:

Soldering Conditions: Reflow soldering is recommended for this LED, the maximum temperature of reflow should not exceed 210°C (when using at 700mA, please adopt the soldering operation mode with copper pad at the bottom. Please consider the life time risk if use the thermal conductive resin with Copper pad at the bottom). If hand soldering, set soldering iron temperature at 350°C and soldering time not More than 3 seconds, after the first soldering, make sure the substrate surface temperature returns to ambient temperature be-fore a second soldering. Do not bend the LED PCB after soldering. Use recommended cleaning agent for PCB cleaning (Should not be use directly in the fluid) Please make sure when soldering, there is no external force on the soldering surface (such as pressure, friction or sharp metal nails, etc.), to avoid gold wire deformation or damage and other abnormalities.

If beyond recommended conditions, we cannot guarantee the LED stability, please do the risk assess-ment first.

#### 3.Anti-Static Measures:

Please take adequate measures to prevent electrostatic generation, such as wearing electrostatic ring or anti-static fingerstall etc; any relative products like plant equipment, machinery, carrier and transporta-tion units shall be connected to discharging unit/ ground. After assembly, please make sure to discharge Static Electricity with proper ESD equipment.

#### **4.Temperature Control:**

Recommended temperature conditions for enhanced product life: The temperature of copper pad is <75°C . Dur-ing assembly, please ensure that a good quality thermal paste is applied and distributed evenly over the surface. While using thermal pad (Heat Sink), make sure LED is firmly tightened and there is no gap between surfaces. This product Heating conditions, tested at 500V with medium surface contact.

#### 5.drive control:

Drive this product at constant current. Output current range specifications should be according to the operational and other conditions, as mentioned in data sheet. Before using a constant voltage source or altered specifications, other than recommended, please consider risk factors.

#### 6.Other:

Product is not suitable to use in following conditions;

- —-Direct or indirect wet / damp conditions, such as rain, etc;
- —in contact with sea water and erosive materials;
- —-Exposed to corrosive gases (e.g., Cl2, H2S, NH3, SOx, NOx, etc.);

#### **Technical Data Sheet**

—-Exposed to dust, liquids or oils;

#### Terms and conditions for the usage of this document:

- 1. The information included in this document reflects representative usage scenarios and is intended for technical reference only.
- 2. The part number, type, and specifications mentioned in this document are subject to future change and improvement without notice. Before production usage customer should refer to the latest datasheet for the updated specifications.
- 3. When using the products referenced in this document, please make sure the product is being operated within the environmental and electrical limits specified in the datasheet. If customer usage exceeds the specified limits, Luckylight will not be responsible for any subsequent issues.
- 4. The information in this document applies to typical usage in consumer electronics applications. If customer's application has special reliability requirements or have life-threatening liabilities, such as automotive or medical usage, please consult with Luckylight representative for further assistance.
- 5. The contents and information of this document may not be reproduced or re-transmitted without permission by Luckylight.
